K2bio Your Research, Your Way

Lab Space Designed to Advance Discovery and Innovation

Located in Houston's "Goldilocks Zone", K2bio provides purpose-built, turnkey lab space designed for biotech startups and established research teams. Our hybrid CRO model offers the flexibility to work independently or partner with in-house scientists for added expertise and resources, helping you advance discovery faster and more efficiently.

Comprehensive Lab Capabilities

- 6,945 sq ft BSL-2–certified space, including CLIA and development labs
- Fully equipped and ready to use biological safety cabinets, fume hoods, centrifuges, incubators, and shared instrumentation
- Private or shared bench options to fit your project scale and budget
- Cold-chain storage (LN_2, –80°C, –20°C, 2–8°C) with continuous monitoring
- Advanced technologies such as Flow cytometry, LC-MS/MS, qPCR, ddPCR, Luminex, and, HPLC

Support Beyond the Bench

Beyond lab space, K2bio is a trusted scientific partner. Our on-site team provides expertise in assay development, potency and cytotoxicity testing, immunoassays, gene expression, biomarker analysis, and analytical services. We also offer regulatory guidance and phase-appropriate documentation to ensure data integrity, compliance, and confidence from discovery through IND-enabling studies.

Why Choose K2bio

- Move from concept to discovery without delay: Turnkey lab space is ready for immediate use
- No buildout or procurement hurdles: Begin your studies on day one with fully equipped facilities
- Collaborative community of innovators: Connect with biotech startups, scientists, and CRO partners to foster knowledge exchange and partnerships
- On-site scientific expertise: Leverage in-house specialists and advanced instrumentation to complement your team's capabilities
- Prime Houston location: Place your research in the city's thriving life sciences corridor near the Texas Medical Center
